03 · USAGE PRINCIPLES

- **Lead with green.** Deep Forest anchors every layout — headers, primary data series, brand bars.
- **Earn the terracotta.** Reserve Clay Terracotta for displacement, emissions, or critical callouts. Never as a neutral accent.
- **Sentence case only.** Headlines, labels, and figure titles use sentence case. Never ALL CAPS, never Title Case.
- **Two weights in body.** Montserrat 400 for body, 600 for emphasis. Avoid 500 mid-paragraph.
- **Eyebrows in Deep Forest.** Small uppercase labels with +160 tracking, always in the primary green.
- **Cream over white for covers.** Use #F5F1E8 for cover and section-opener backgrounds to warm the palette.
- **Category order is fixed.** When using the 4-series set, always sequence Forest → Ochre → Terracotta → Slate.
- **Accessibility baseline.** Pair color with pattern or shape on every multi-series chart to meet Section 508.

02 · COLOR PALETTE

PRIMARY — GREENS

Deep forest
#2D5F3F

Sage
#7BA185

Fresh green
#A8C97F

CONTRAST ACCENTS

Cream
#F5F1E8

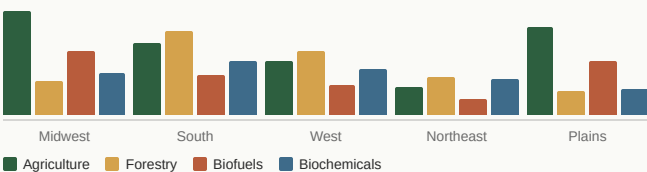

White
#FFFFFF

04 · CHART APPLICATION

Bioeconomy output by sector and region

Billions USD · 2025 · Figure 6.1

- **No chart borders.** Use a single baseline rule (0.5 px) and horizontal gridlines only.
- **Axis labels in warm gray.** Scaffolding recedes; data advances.
- **Always cite source.** 8 pt source line, divider above, under every figure.
